Yes. There was a problem with the identification of the sample IDs during the March 2015 field collection. Attached is a revised figure. I'll check on the agenda with Bob. Jim H

Jim

Do you think there is a transcription error (or mislabeling of samples) for tt101? Note that the box for the December data for 103d1 appears to have a typo (two results for 103d1).

Any word back from Bob on the agenda?
